12th International Training Research Seminar in Child & Adolescent Psychiatry
A Research Training Course for Junior Investigators in Child Psychiatry and Psychiatry

19- 24th June 2016

Structure of the educational project:

The Foundation Child is pleased to announce the 12th Training Course in Child and Adolescent Psychiatry for young researchers in child and adolescent psychiatry and psychiatry.

The aim of the course is to provide a high-quality intensive training experience that will offer training on the relevant elements of clinical science (diagnosis, treatment, and prevention of the most important childhood psychiatric disorders) and research (designing a research project, research methods, basic principles of statistics, writing and presenting scientific work). In addition, the course is designed to provide tutorials, networking and other valuable educational activities that will enhance the education of junior investigators.

The six-day seminar will include lectures and interactive sessions conducted by an international panel of highly qualified faculty with recognized expertise in their respective fields. The seminar will take place in a peaceful and stimulating environment that has been chosen to facilitate this unique training experience.

Information about the Training Research Seminar:

- Six days of intensive training on topics related to research in child and adolescent psychiatry. Trainees are required to attend all scheduled activities;
- The training is addressed to junior researchers in child and adolescent psychiatry or psychiatry that have proven interest in developmental psychopathology.

Candidates must:

- Be a physician or a researcher with training in a relevant medical specialty;
- Have a strong commitment to research in child and adolescent psychiatry;
- Demonstrated productivity in child and adolescent psychiatry research;

Active, demonstrable participation in a research project and/or relevant scientific publications.

Trainees are responsible only for their travel costs to and from the seminar site. We will pay for application fees, tuition, food and lodging.

Candidates:

- NUMBER: Maximum of 40 young researchers or specialists under the age of 35, or no more than 5 years since completing training;
- Must be nominated by an Academic Professor of Psychiatry and/or Child and Adolescent Psychiatry at an identifiable center for psychiatric research and training;
• Must want to develop specific competence in the following areas of child and adolescent psychiatry: clinical research (diagnosis, treatment and prevention of child psychiatric disorders), applied/translational research and/or research training/management.

**Must demonstrate at least one of the following:**
1. At least one publication (as author or co-author) on a peer reviewed and/or indexed on PubMed;
2. At least one poster or other presentation during a Psychiatry or Child and Adolescent Psychiatry Congress (National or International);
3. Presently or recently involved, in a relevant research project in child and adolescent psychiatry or developmental psychopathology;
4. A willingness to attend and entirely to attend the whole seminar.
