# 10<sup>th</sup> INTERNATIONAL TRAINING SEMINAR IN CHILD & ADOLESCENT PSYCHIATRY

*A Research Training Course  
for Junior Investigators  
in Child Psychiatry and Psychiatry*

**MONASTERO SANTA CROCE**

Via Santa Croce, 30

Bocca di Magra, La Spezia, Italy

June 23<sup>th</sup>-29<sup>th</sup>, 2013

### ● Educational aim.

In recent years, Child and Adolescent Psychiatry research and practice have seen a dramatic growth with the introduction of new and refined diagnostic tools, innovative research tools and substantial progress in therapeutic and preventive approaches to developmental psychopathology. These innovations have been accompanied by strong advances in many areas of scientific research, including epidemiology, neuroscience, and genetics. As a result, the 10th Child and Adolescent Psychiatry Research Training Seminar has been created to prepare junior investigators to be part of this scientific and clinical revolution.

The 10th Child and Adolescent Psychiatry Research Training Seminar will take place in Bocca di Magra, Italy, on June 23-29, 2013.

### ● Structure of the educational project.

The Foundation Child and the Working Group on Child and Adolescent Psychiatry of the Italian Society of Psychopathology (SOPSI) are pleased to announce the 10th Training Course in Child and Adolescent Psychiatry for young researchers in child and adolescent psychiatry. The aim of the training seminar is to provide a high-quality intensive experience that will offer training on relevant elements of clinical science (diagnosis, treatment, and prevention of the most important childhood psychiatric disorders) and research (designing a research project, research methods, basic principles of statistics, writing and presenting scientific work). In addition, the seminar is designed to provide tutorials, networking and other valuable educational activities in order to enhance the education of junior investigators.

The five-day seminar will include lectures and interactive sessions, which will be conducted by an international panel of highly qualified faculty members with recognized expertise in their respective fields. The seminar will take place in a pleasant environment that has been chosen to facilitate this unique training experience.

### ● The Final Deadline for all Applications is: March 15th 2013.

#### Basic information about the Course:

- Five-full days of intensive training on topics related to research in child and adolescent psychiatry. Trainees are expected to attend all scheduled activities;
- The training is targeted for junior researchers in child and adolescent psychiatry or psychiatry, with an interest in developmental psychopathology.

#### Candidates must:

- Be a physician with training in a relevant medical specialty;
- Have a strong commitment to research in child and adolescent psychiatry;
- Demonstrated productivity in child and adolescent psychiatry research;
- Active, demonstrable participation in a research project And/or relevant scientific publications.

### ● Trainees are responsible only for their travel costs to and from the seminar site. We will pay for application fees, tuition, food and lodging.

#### Candidates:

- NUMBER: Maximum of 40 young researchers or specialists under the age of 35, or no more than 5 years since completing training;
- Must be nominated by an Academic Professor of Psychiatry and/or Child and Adolescent Psychiatry at an identifiable center for psychiatric research and training;
- Willing to develop specific competence in the following areas of child and adolescent psychiatry: clinical research (diagnosis, treatment and prevention of child psychiatric disorders), applied/translational research and/or research training/management.

#### Must demonstrate at least one of the following:

1. At least one publication (as author or co-author) on a peer reviewed and/or indexed on PubMed;
2. At least one poster or other presentation during a Psychiatry or Child and Adolescent Psychiatry Congress (National or International);
3. Presently or recently involved in a relevant research project in child and adolescent psychiatry or developmental psychopathology;
4. A willingness to attend and entirely participate the one-week seminar.
